

The table below shows the time windows when high tides at Spurn are predicted to be above 6.8m. When tides are above 6.8m, it is likely that the sea will wash over the beach and into the estuary.

**Crossing the beach during these time windows is dangerous and should not be attempted**

Visitors should be aware that weather conditions can also have an impact on tide height, and we strongly advise checking the weather forecast and tide times ahead of your visit
